

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday May 20, 2007 - 0800 MDT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	92 (Light)
New large fires:	2 (*)
Large fires contained:	1
Uncontained large fires:	18
Area Command Teams committed:	1
NIMOs committed:	2
Type 1 IMTs committed:	3
Type 2 IMTs committed:	3
Fire Use Teams committed:	

\*\* Uncontained large fires do not include WFU or confine/contain incidents. \*\*

**Southern Area (PL 5)**

New fires:	14
New large fires:	0
Uncontained large fires:	13
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

Area Command Team (Rounsaville) assigned to assist with creating a strategic plan for suppression action in Florida.

**Florida Bugaboo**, National Forests in Florida. Unified Command between IMT 1 (Quesinberry) and Florida DOF (Greene). NIMO (Ferguson). Baker County, FL. Southern rough. Low to moderated fire activity. Numerous structures in several communities remain threatened.

**Bugaboo Scrub**, Okefenokee NWR. IMT 1 (Oltrogge). IMT also managing the Big Turnaround fire. Sixteen miles west of Folkston, GA. Southern rough and timber. Creeping and smoldering with short surface runs. Numerous structures and a state park remain threatened.

**Bugaboo Scrub 2**, Georgia Forestry Commission. IMT 2 (Hannemann). IMT also managing the Sweat Farm Road, Roundabout Swamp and Kneeknocker Swamp fires. Started on private land five miles east of Fargo, GA. Southern rough and timber. Smoldering, single tree torching and spotting.

**Big Turnaround Complex** (two fires), Okefenokee NWR. Ten miles southeast of Waycross, GA. Southern rough and timber. Creeping and smoldering with short duration runs. A community, refuge facilities, railroad infrastructure and microwave installation threatened.

**BICY Complex** (five fires), Big Cypress National Preserve. IMT 1 (Stanich). Fifty-one miles west of Ft. Lauderdale, FL. Southern rough. High fire activity.

**Dairy Road**, Florida DOF. Seven miles northwest of Keystone Heights, FL. Southern rough. Numerous residences remain threatened. Smoldering.

**Sweat Farm Road**, Georgia Forestry Commission. Started on private land 10 miles west of Waycross, GA. Southern rough and timber. Minimal fire activity. Structures, a state forest and refuge remain threatened. Increase in acreage is due to more accurate mapping.

**Roundabout Swamp**, Georgia Forestry Commission. Started on private land four miles west of Pearson, GA. Southern rough and timber. Minimal fire activity.

**Knee Knocker Swamp**, Georgia Forestry Commission. One mile northwest of Nahunta, GA. Southern rough. Low to moderate fire activity.

**Deland Complex** (three fires), Florida DOF. Six miles west of Ormond Beach. Southern rough. Low to moderate fire activity.

**Paterson**, Florida DOF. Eighteen miles east of Lehigh Acres, FL. Southern rough. High rates of spread with spotting. No further information.

**Callaway Height**, Florida DOF. Eight miles northeast of Callaway, FL. Southern rough. No new information. Last report unless new information is received.

**Oompa**, Florida Panther National Wildlife Refuge. Twenty-five miles east of Naples, FL. Grass. No new information.

**Predictive Services Discussion:** Dry conditions will continue today over the Southeast under high pressure. Thunderstorms will develop over the Eastern Great Basin and Arizona today with some storms being dry. The Great Basin and northwest Arizona will see increased winds ahead of an approaching low pressure trough.

## VEHICLE ENTRAPMENT

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Fire out around the vehicle if there is time.
- Park behind a natural barrier or structure.
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles or draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway, remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
  - Temperatures may reach over 200 degrees Fahrenheit.
  - Smoke and sparks may enter the vehicle.
  - Plastic parts may start to melt and give off toxic gases.
  - Windows may start to crack.
  - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
  - Each crewmember should cover himself/herself with a fire shelter.
  - Exit the vehicle from the side away from the greatest heat.
  - Stay together and get as low to the ground as possible, moving away from the vehicle.
  - Deploy your shelter in a safe area.
